

## SOFT WOOL CARE

### TECHNICAL FEATURES

**Specific additive with anti-felting action for washing and wool recovery treatment.**

Soft Wool Care reduces felting of wool during wet processing, with the possibility of moving the material more during treatments.

Shrinkage of the material, due to felting, is largely avoided.

The hand structure of fabrics and knitted materials remains unchanged.

### METHOD AND DOSAGE OF USE

As an anti-felting protective agent in washing processes:

- Add 10-15 g of Soft Wool Care per litre of water to the washing bath.

For recovery treatments of felted wool garments:

- Dissolve 30-40 g of Soft Wool Care per litre of cold or slightly warm water (bath ratio 1:5),
- Soak the wool by moving the solution for about a minute.
- Leave to soak for about 15-20 minutes.
- Remove the wool from the treatment solution without rinsing,
- Apply light traction and leave to dry away from heat sources.

### CHEMICAL COMPOSITION/CHARACTERISTICS

Color:	Very light straw
Odor:	Characteristic
Specific weight at 20° C:	1,01 ± 0,05
pH sol. 1%	7 ± 0,5

### WARNINGS

Given the unpredictable but proven instability of some dyes used for dyeing fabrics, it is advisable to perform a check before washing.
